

Terra Australis

When
you go to bed (of a night)
the hands of the clock go whizzing around
((while you go into a frenzy
of tossing and turning and thrashing about (followed by
periods of inactivity))
so why do you “um’n’ah”?)

Che Gvarra was an asthmatic;
when an insect flew into his ear, he shone a torch into it
and it walked out

/

Take a deep breath Shakespeare!
(The blow-fly is over by the curtain)

.....
How loud *was* the BIG BANG?!

.....
(Tying knots and making PENTAGRAMS)

These are the figures around the camp-site:

(It’s illegal to wear a false-moustache)

A tree --- carved with the letter L

A land --- belonging to NO-ONE else!

How can an ANT survive in a microwave?
(see Page 12)

A housefly can react
to something in the air, and instantly
change direction

Clit:
“blowing
the coals of those amorous fires”, Mozart wrote
27 string Quartets

(The things you do for coffee!)

Can a fly stop a train?!

Mozart died of typhoid!

(Stay with me!) Nijinsky died in 1950

/

go to sleep

making
a mountain out of a molehill
could cost you up to 500 calories an hour;
running around in circles: 350
pushing your luck, jumping to conclusions, throwing your
weight around, and belting your head up against
a brickwall:

870!

.....

In 1699

.....William Dampier
..... published "Discourse of
.....Winds
..... Currents
Storms
..... and Tides"
